PRELIMINARY AMENDMENT In re Application of: Vick Serial No. 10/676,579 Filing Date: January 29, 2004 Page 4 of 10

AMENDMENTS TO CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application.

Listing of Claims

Claims 1-34 (Cancelled)

- 35. (Currently Amended) A device for tightening a strap around freight, comprising:
 - a. a body capable of being rotated and comprising:
 - i. a means for holding a first end of a strap; and
- ii. a first head positioned at a first end of the body for receiving a torsion arm; and
- b. a clamp coupled to the body for holding a second end of the strap and comprising:
- i. at least two clamp arms, wherein at least one arm is rotatably coupled to the clamp; and
- ii. a cam rotatably coupled to the clamp for securing the at least two clamp arms at a second end.
- 36. (Original) The device of claim 35, wherein the means for holding a strap comprises a slot.
- 37. (Cancelled) The device of claim 35, further comprising a cam rotatably coupled to the clamp for securing the at least two clamp arms at a second end.

PRELIMINARY AMENDMENT In re Application of: Vick Serial No. 10/676,579 Filing Date: January 29, 2004 Page 5 of 10

38. (Original) The device of claim 37, further comprising a locking arm coupled to the cam for attaching the cam to the clamp arm.

Claims 39-40 (Cancelled)

- 41. (New) The device of claim 35, wherein the torsion arm is capable of rotating the body.
- 42. (New) The device of claim 35, wherein the torsion arm is adapted to connect to the first head.
- 43. (New) The device of claim 35, wherein the torsion arm is capable of being removed from the first head.
- 44. (New) The device of claim 35, wherein the torsion arm comprises at least one of the following: a wrench, a ratchet, a bar stock, or integrated portion of the body.
 - 45. (New) A method for tightening a strap for securing freight, comprising: providing a tightening device, comprising
 - a body capable of being rotated and comprising:
 - a means for holding a first end of a strap; and
 - a first head positioned at a first end of the body for receiving a torsion arm; and
 - a clamp coupled to the body for holding a second end of the strap and

comprising:

at least two clamp arms, wherein at least one arm is rotatably coupled to the clamp; and

a cam rotatably coupled to the clamp for securing the at least two clamp arms at a second end;

holding a first end of a strap with the means for holding a first end of a strap;

PRELIMINARY AMENDMENT

securing a portion of the strap with the clamp; and rotating the body, thereby increasing tension on the strap.

- 46. (New) The method of claim 45, wherein securing a portion of the strap with the clamp comprises rotating the cam until the two clamp arms contact the strap.
- 47. (New) The method of claim 45, wherein rotating the body comprises connecting a torsion arm to the first head, and applying a force to the torsion arm.
- 48. (New) The method of claim 45, wherein the means for holding a strap comprises a slot.
- 49. (New) The method of claim 48, wherein holding a first end of a strap with the means for holding a first end of a strap comprises inserting the strap into the slot.
- 50. (New) The method of claim 45, further comprising a locking arm coupled to the cam for attaching the cam to the clamp arm.
- 51. (New) The method of claim 45, wherein the torsion arm is capable of rotating the body.
- 52. (New) The method of claim 45, wherein the torsion arm is adapted to connect to the first head.
- 53. (New) The method of claim 45, wherein the torsion arm is capable of being removed from the first head.

PRELIMINARY AMENDMENT In re Application of: Vick Serial No. 10/676,579 Filing Date: January 29, 2004 Page 7 of 10

54. (New) The method of claim 45, wherein the torsion arm comprises at least one of the following: a wrench, a ratchet, a bar stock, or integrated portion of the body.
